SUMMARY

Full-Stack PHP Developer with 4+ years of experience in designing and developing CRM, ERP, and e-commerce platforms using PHP, CodeIgniter, MySQL, and REST APIs. Skilled in third-party integrations including AWS S3, Firebase, Stripe, Razorpay, and OpenAI. Strong in building scalable backend architecture, improving system performance, and ensuring secure API communication. Experienced in full project lifecycle, deployment handling, API security, and team coordination.

SKILLS

- Primary Skills:** PHP, CodeIgniter 3/4, MySQL, REST APIs, HTML5, CSS3, jQuery, JavaScript, Bootstrap
- Secondary Skills:** Laravel, React.js, Node.js, Firebase, Webhooks, Stripe, Razorpay, Twilio, ElevenLabs, Vapi, Google Calendar API, AWS S3
- Tools & Platforms:** GitHub, VS Code, Jira, Postman, Linux
- Development:** MVC Architecture, CI/CD, JWT, OAuth2, Unit Testing, Server Deployment & Maintenance

EXPERIENCE

Codeigniter Developer | Lockene.inc

Sep 2023 - Present Nagpur, Maharashtra

Project: Lockene CRM (<https://lockene.us>)

Tech Stack: CodeIgniter 4, PHP, MySQL, Bootstrap, jQuery, Firebase, AWS S3, OpenAI API, Payment Gateway Integrations

- Built and maintained all major CRM modules: **Leads/Sales, Accounting, Inventory, Ticket System, HR.**
- Developed secure and scalable **REST APIs** for CRM and mobile applications.
- Integrated **Payment Gateway, OpenAI API** (sales summary automation), **Firebase**, and **AWS S3** for file handling.
- Designed system architecture, optimized MySQL queries, and developed features using **CodeIgniter 4**.
- Served as **Team Lead** task assignment, code reviews, guiding junior developers.
- Handled **server deployment**, cron jobs, backups, and production environment updates.

Junior PHP Developer | Brainz1techub

Mar 2022 - Sep 2023 Nagpur, Maharashtra

Projects: CRM, Real Estate System, ERP + E-commerce, Accounting, Restaurant Management, MLM Product

Tech Stack: Core PHP, CodeIgniter 3/4, MySQL, Bootstrap, jQuery, Payment Gateway APIs, Shiprocket, Fast2SMS

- Developed **Sales Management & Project Tracking CRM** using Core PHP, Bootstrap, and jQuery.
- Built a complete **Real Estate System** including plot selling, part-payment tracking, and accounting workflow.
- Developed a combined **ERP + E-commerce System** for store stock management and online product sales.
- Worked on **Accounting software** for tuition classes and a **MLM-based project** with commission logic.
- Built modules for a **Restaurant Management System** using CodeIgniter 3.
- Integrated **Payment Gateways, Shiprocket** for shipping, and **Fast2SMS** for OTP notifications.
- Promoted to **Team Lead** handled team coordination, client discussions, and module planning.
- Managed **end-to-end deployment**, hosting setup, and production maintenance for all projects.

EDUCATION

Bachelor of Electronics & Telecom

Bapurao Deshmukh College of Engineering

2015 - 2019 Sevagram, Maharashtra

Diploma of Electronics & Telecom

Agnihotri School of Technology

2012 - 2015 Wardha, Maharashtra

PHP Intern | Brainz1techhub

📅 Aug 2021 - Mar 2022 📍 Nagpur, Maharashtra

- Worked on modules for a **Matrimony Website** and a **Real Estate Stock Management System** using Core PHP and MySQL.
- Developed responsive UI components and forms using **Bootstrap** and **jQuery**.
- Gained practical experience with **Object-Oriented PHP**, database design, and CRUD operations.

TECHNICAL STRENGTHS

- Modular backend development
- API design & security
- Database schema planning & optimization
- Production deployment & server management
- Requirement analysis & team coordination

KEY ACHIEVEMENTS

- Delivered 10+ enterprise modules across CRM, ERP, sales, and e-commerce systems.
- Improved system and API performance through database optimization and clean architecture.
- Integrated major third-party services including AWS S3, Payment Gateways, Firebase, and OpenAI.
- Led developers and managed on-time delivery with strong code quality and planning.
- Handled full project lifecycle, requirements, development, testing, deployment & maintenance.

SELF PROJECTS

ASG (Event & Ledger Manager)

Developed an online **ledger and event management system** with secure record tracking and user accounts.

Tech Stack: CodeIgniter, PHP, MySQL, Bootstrap

Submitter (Free Form Submission Service)

Built a lightweight **Backend-as-a-Service** that sends form submissions directly to the user's email.

Tech Stack: CodeIgniter, PHP, MySQL, SMTP, Bootstrap

KitCat (Realtime Chat App)

Created a **real-time chatting application** using Firebase for instant messaging and user presence tracking.

Tech Stack: Firebase Realtime DB, JavaScript, Bootstrap

DMPL (E-commerce + ERP)

Developed a **Core PHP-based e-commerce + ERP system** for product stock management and online sales (ongoing project).

Tech Stack: Core PHP, MySQL, jQuery, Bootstrap, Payment Gateway
